**Alliance Sensors Group and Wilmington Instrument Company
Have Partnered to Distribute ASG's Linear Position Sensors**

Moorestown, New Jersey, September 12, 2016... [H. G. Schaevitz LLC dba Alliance Sensors Group](http://www.alliancesensors.com) is pleased to announce a partnership with Wilmington Instrument Company in Wilmington, CA to distribute its line of LVDT and LVIT linear position sensors. Wilmington Instrument Company is an ISO/IEC 17025:2005 accredited calibration laboratory and full-service distributor of process and test instrumentation. They are a stable privately-owned corporation that has been in operation since 1944, and at their present location since 1950. They service a broad range of industries including petrochemical, power generation, water and wastewater management, aerospace, shipbuilding and maritime, pharmaceutical, food processing, and construction.

Alliance Sensors Group, founded by the Schaevitz family, has continued to expand its line of linear position sensors using LVIT Technology™ reaching into the automation and fluid power market places as well as power generation and civil engineering. The LR and LV series of LVIT products are inductive, contactless devices with excellent stroke-to-length ratio giving a clear advantage over resistive potentiometers.

"Alliance Sensors is excited to partner with a sales channel as prominent as Wilmington Instrument Company. We feel they can help us target the Automation marketplace in ways we could not handle directly and gives us a solid presence in the western side of North American," says John Matlack VP of Sales and Marketing for ASG.

Visit Wilmington Instrument Company to find ASG's complete line of products.
